Biomechanical solutions to lower limb pain

Neil Smith

Certified Pedorthist C.Ped.Au ▶

specialising in Orthotics and Biomechanics. He has worked in the Orthotic industry for over 30 years and either personally made or overseen the manufacture of more than 150,000 pairs of orthotics

Neil's Clients ▶

His clients have included, Australian representative sportspeople in Cricket, Rugby League, AFL, Soccer, Netball, Basketball, Rugby Union, Running and Boxing. Thousands of non-athletes and children with painful foot and lower limb pain have also benefited from Neil's orthotics.

Inventor of VFAS ▶

Neil began work on the VFAS in the mid 1990s after attending University, when he became convinced there must be a better and more accurate way to prescribe and make orthotics. The system was almost five years in the development phase and has been rigorously tested with University Research and patients with foot and lower limb pain from poor foot posture. Read some of the testimonials Neil has received from patients who have benefited from the VFAS.

All VFAS orthotics are made in Neil's Vertical Orthotics Laboratory in Marrickville, Sydney

Custom Orthotics and Foot Aligners

Specially formulated Foot Aligner templates produce on the spot custom corrected weight bearing orthotics

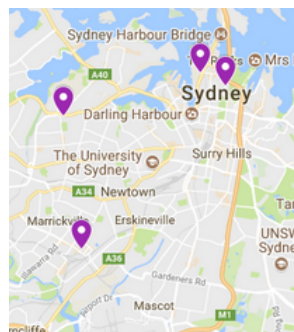

CUSTOM ORTHOTICS

Many individuals have asymmetrical feet or need a custom-fitted orthotic device to experience real relief. Additionally, an ill-fitted orthotic device may cause more issues than it can help. It can offer the incorrect sort of support, or support in the wrong area of the foot. This could make health issues worse, including inflaming issues due to incorrect pressure. You should always be fitted by an experienced VFAS weight bearing orthotic therapist.

CONDITIONS TREATED

Achilles Tendonitis	██████████
Flat Feet	██████████
Heel Spurs	██████████
